Yener Bas

Front End Developer
(information-electronics technician)

About Me

I am a German-speaking Front End Web Developer with experience in creating web apps with JavaScript & Angular. You can find my responsive websites and business apps comprehensively in my public portfolio. I started my IT journey with an apprenticeship as an information electronics technician and I discovered my interest in coding at the age of 15 and started building simple websites with HTML & CSS. While working as an IT admin for a large hospital, I decided that I wanted to expand my coding skills and to focus on software development full time. After building a myriad of projects I am looking forward to building on my first experience and starting my career in IT in a junior developer position.

Main Stack:

- JavaScript
- TypeScript, Angular
- HTML, CSS, Bootstrap

Side Stack:

- Git, APIs (REST), Google Firebase

Skills

-
- **Building Applications with JavaScript & Angular:** I built landing pages and several web apps as well as OOP-based Jump and Run Games. In various projects, we were working with Github collaboration and also coded live together.
 - **Deep understanding of IT & Software:** Due to my background as an IT and electronics specialist, I do understand computer software and hardware very well.
 - **High sense of responsibility:** I am used to taking responsibility and working diligently as I always did in my job as an information-electronics technician.
